

Worry-Free Maintenance & Repair

Sprinkler Service Agreement Plan

Help protect yourself and your lawn sprinkler system from unexpected problems and repairs. The Service Agreement Plan is transferable if you sell your home to the new owners or to your new home in the central Arkansas area.

A lawn sprinkler system service agreement plan includes two visits per year (spring & winter). If a plumbing system service agreement is purchased with a lawn system agreement, the plumbing and sprinkler visits will be done on the same visit.

A Sprinkler Service Agreement includes the following:

Spring startup includes:

- Re-installing your R.P.Z.A. (backflow preventer)
- Turning on sprinkler water meter
- Adjusting the time clock
- Running the system & checking all zones
- Check for leaking pipes

Winter shut-down include:

- Turning off the time clock
- Turning off sprinkler water meter
- Disconnecting and storing your R.P.Z.A.
- Draining and flushing system
- Covering R.P.Z.A. connections

NOTE: Due to the possibility of improper installation or design flaws in a system, Ray Lusk Sprinklers cannot warranty or guarantee against freeze damage.
